About **Libraesva**

Libraesva is the Italian leading provider of advanced email security solutions founded as a spin-off from the structure of software development of Libra. Libraesva stands today as one of the most important brands in the world of security, with a huge installed base. The email content gateway solution ESVA - Email Security Virtual Appliance, developed since 2005, has been recognized by the prestigious Virus Bulletin as one of the best and effective systems of protection and analysis of email content. In 2014, ESVA won the Computing Security Award as 'Antispam of the Year' solution.
